5. Now you can enable the permissions you want and whitelist the IP's of your choice (Bind IP Address) including palmas IP **46.19.9.48**
Once you have done that click on **“Create”**

The screenshot shows the 'API Management' section of the Huobi Global website. The main heading is 'Create API Key'. Below this, there is a 'Notes' field with a redacted value. The 'Permission settings' section is set to 'Multiple choice' and includes three checked options: 'Read-only', 'Withdraw', and 'Trade'. The 'Bind IP address (optional)' field contains the IP address '46.19.9.48'. A note on the right side provides instructions on API key usage, including a warning to avoid loss of assets. A blue 'Create' button is located at the bottom of the form. Below the form is a table titled 'My API Key' with columns for 'Create Date', 'Notes', 'Permission', 'Access Key', 'Bind IP Address', 'Expire in (days)', 'Status', and 'Action'.

6. Click on **“Click to send”** to receive the confirmation email, then enter your email code and enter 2FA code (if enabled). You have 60 seconds to fulfil this task, then click on **“Confirm”** to create API key.

The screenshot shows a 'Security authentication' dialog box. It has a title bar with a close button (X). The main content area contains an 'Email verification code' input field with a red circle around the 'Click to send' button next to it. Below this is a text prompt: 'Enter the code that your email [redacted] received'. There is a 'GA code' input field below that. At the bottom left, there is a link 'Security item lost?'. At the bottom right, there are two buttons: 'Cancel' and 'Confirm'.

7. Copy and paste the API Key data, the Secret and the User ID into PalmaBot API Settings. Then click **“Confirm”**.

Successfully Create ✕

! The key shows only once and can not be retrieved once lost. Please keep it properly.

Bind IP Address
46.19.9.48

Tips

- To avoid asset loss, please do not tell your Secret Key or Access Key to others.
- If you forget your Secret Key, please delete it and apply for a new Secret Key pair.

[Confirm](#)

8. After you have copied all the data into PalmaBot API settings, check that you have chosen the right exchange and click test and save API data.

PalmaBot API settings

Welcome 🐼:)

PalmaBot exchange API settings allow you to **connect your favorite exchange with PalmaBot**. You create API key and API secret on your exchange. Use fields below to enter API key and API secret. [How to connect Bitstamp with PalmaBot - example.](#)

huobipro ▾

API key...
API secret...
User ID - only Bitstamp or Cex...
<input type="button" value="test and save API data"/>

Advanced user security

To advance your security measurements we advise whitelisting our server IP address **46.19.9.48** next to your device IPs in exchange API section on all of your exchanges.

Congratulations! You just connected PalmaBot with your HuobiPro account.
